

OpenStreamOnFile(3w)

Wine API

OpenStreamOnFile(3w)

NAME**OpenStreamOnFile** (MAPI32.147)**SYNOPSIS**

```
HRESULT OpenStreamOnFile
(
    LPALLOCATEBUFFER lpAlloc,
    LPFREEBUFFER     lpFree,
    ULONG             ulFlags,
    LPWSTR            lpszPath,
    LPWSTR            lpszPrefix,
    LPSTREAM*         lppStream
)
```

DESCRIPTION

Create a stream on a file.

PARAMS

lpAlloc [**In**] Memory allocation function.

lpFree [**In**] Memory free function.

ulFlags [**In**] Flags controlling the opening process.

lpszPath [**In**] Path of file to create stream on.

lpszPrefix [**In**] Prefix of the temporary file name (if *ulFlags* includes **SOF_UNIQUEFILENAME**).

lppStream [**Out**] Destination for created stream.

RETURNS

Success: **S_OK**. *lppStream* contains the new stream object

Failure: **E_INVALIDARG** if any parameter is invalid, or an **HRESULT** error code describing the error.

IMPLEMENTATION

Defined in "**mapiutil.h**".

Implemented in "**dlls/mapi32/util.c**".

Debug channel "**mapi**".
