

Padre::Plugin::SpellCheck::Dialog(3pm) User Contributed Perl Documentation Padre::Plugin::SpellCheck::Dialog(3pm)

NAME

Padre::Plugin::SpellCheck::Dialog – dialog for padre spell check

DESCRIPTION

This module implements the dialog window that will be used to interact with the user when mistakes have been spotted.

PUBLIC METHODS

Constructor

```
my $dialog = PPS::Dialog->new( %params );
```

Create and return a new dialog window. The following params are needed:

text => \$text

The text being spell checked.

offset => \$offset

The offset of \$text within the editor. 0 if spell checking the whole file.

error => [\$word, \$pos]

The first spotted error, on \$word (at position \$pos), with some associated \$suggestions (a list reference).

engine => \$engine

The \$engine being used (a Padre::Plugin::SpellCheck::Engine object).

Instance methods

SEE ALSO

For all related information (bug reporting, source code repository, etc.), refer to Padre::Plugin::SpellCheck.
