

pacparser_enable_microsoft_extensions(3)

pacparser_enable_microsoft_extensions(3)

NAME

pacparser_enable_microsoft_extensions – Enable Microsoft PAC extensions.

SYNOPSIS

```
#include <../pacparser.h>
```

```
void pacparser_enable_microsoft_extensions(void);
```

DESCRIPTION

Enables a subset of Microsoft PAC extensions - dnsResolveEx, myIpAddressEx, isResolvableEx. These functions are used by Google Chrome and IE to work with IPv6. More info: <http://code.google.com/p/pacparser/issues/detail?id=4>.
