

ExtUtils::XSpp::Node::Raw(3)

User Contributed Perl Documentation

ExtUtils::XSpp::Node::Raw(3)

NAME

ExtUtils::XSpp::Node::Raw – Node for data that should be included in XS verbatim

DESCRIPTION

An ExtUtils::XSpp::Node subclass representing code that should be included in the output XS code verbatim.

METHODS**new**

Creates a new ExtUtils::XSpp::Node::Raw.

Named parameters: `rows` should be a reference to an array of source code lines. A trailing newline is automatically appended.

ACCESSORS**rows**

Returns an array reference holding the rows to be output in the final file.
