

FcMatrixScale(3)

FcMatrixScale(3)

NAME

FcMatrixScale – Scale a matrix

SYNOPSIS

```
#include <fontconfig/fontconfig.h>
```

```
void FcMatrixScale (FcMatrix *matrix, double sx, double dy);
```

DESCRIPTION

FcMatrixScale multiplies *matrix* x values by *sx* and y values by *dy*. This is done by multiplying by the matrix:

```
sx 0  
0 dy
```
