NAME

explain_futimes_or_die − change file timestamps and report errors

SYNOPSIS

#include <libexplain/futimes.h>

void explain_futimes_or_die(int fildes, const struct timeval *tv);

DESCRIPTION

The **explain_futimes_or_die** function is used to call the *futimes*(3) system call. On failure an explanation will be printed to *stderr*, obtained from *explain_futimes*(3), and then the process terminates by calling exit(EXIT_FAILURE).

This function is intended to be used in a fashion similar to the following example:

```
explain_futimes_or_die(fildes, tv);
```

fildes   The fildes, exactly as to be passed to the *futimes*(3) system call.

tv   The tv, exactly as to be passed to the *futimes*(3) system call.

Returns: This function only returns on success. On failure, prints an explanation and exits.

SEE ALSO

futimes(3)
          change file timestamps

explain_futimes(3)
          explain *futimes*(3) errors

exit(2)   terminate the calling process
