## NAME

$\log 10, \log 10 f, \log 101-$ base-10 logarithmic function

## SYNOPSIS

\#include <math.h>
double $\log 10$ (double $x$ );
float $\log 10 f($ float $x$ );
long double log101(long double $x$ );
Link with $-l m$.
Feature Test Macro Requirements for glibc (see feature_test_macros(7)):
$\log 10 f(), \log 101():$
_ISOC99_SOURCE || _POSIX_C_SOURCE >= 200112L
\|/* Since glibc 2.19: */ _DEFAULT_SOURCE
$\| / *$ Glibc versions < $=2.19:$ */ _BSD_SOURCE $\|$ _SVID_SOURCE

## DESCRIPTION

These functions return the base 10 logarithm of $x$.

## RETURN VALUE

On success, these functions return the base 10 logarithm of $x$.
For special cases, including where $x$ is 0,1 , negative, infinity, or NaN , see $\boldsymbol{\operatorname { l o g }}(3)$.

## ERRORS

See math_error(7) for information on how to determine whether an error has occurred when calling these functions.

For a discussion of the errors that can occur for these functions, see $\boldsymbol{\operatorname { l o g } ( 3 )}$.

## ATTRIBUTES

For an explanation of the terms used in this section, see attributes(7).

| Interface | Attribute | Value |
| :--- | :--- | :--- |
| $\log 10(), \log 10 f(), \log 101()$ | Thread safety | MT-Safe |

## CONFORMING TO

C99, POSIX.1-2001, POSIX.1-2008.
The variant returning double also conforms to SVr4, 4.3BSD, C89.

## SEE ALSO

$\operatorname{cbrt}(3), \operatorname{clog} 10(3), \exp 10(3), \log (3), \log 2(3), \operatorname{sqrt}(3)$

## COLOPHON

This page is part of release 4.09 of the Linux man-pages project. A description of the project, information about reporting bugs, and the latest version of this page, can be found at https://www.kernel.org/doc/man-pages/.
