

NAME

MP3::Tag::ImageExifTool – extract size info from image files via Image::Size.

SYNOPSIS

```
my $db = MP3::Tag::ImageExifTool->new($filename);      # Name of multimedia file  
see MP3::Tag
```

DESCRIPTION

MP3::Tag::ImageExifTool is designed to be called from the MP3::Tag module.

It implements *width()*, *height()* and *mime_type()* methods (sizes in pixels).

They return *undef* if *Image::Size* is not available, or does not return valid data.
