

NAME

MP3::Tag::ImageSize – extract size info from image files via Image::Size.

SYNOPSIS

```
my $db = MP3::Tag::ImageSize->new($filename); # Name of multimedia file
see MP3::Tag
```

DESCRIPTION

MP3::Tag::ImageSize is designed to be called from the MP3::Tag module.

It implements *width()*, *height()* and *mime_type()* methods (sizes in pixels).

They return undef if Image::Size is not available, or does not return valid data.

SEE ALSO

Image::Size, MP3::Tag
