NAME

ne_shave − trim whitespace from a string

SYNOPSIS

#include <ne_string.h>

char *ne_shave(char ***str*, const char ***whitespace***);**

DESCRIPTION

ne_shave returns a portion of *str* with any leading or trailing characters in the *whitespace* array removed. *str* may be modified. Note that the return value may not be equal to *str*.

EXAMPLES

The following code segment will output "fish":

```
char s[] = ".!.fish!.!";
puts(ne_shave(s, ".!"));
```
