Direct3D 10 Interoperability [DEPRECATED](3) Doxygen Direct3D 10 Interoperability [DEPRECATED](3)

NAME

Direct3D 10 Interoperability [DEPRECATED] -

Enumerations

enum cudaD3D10MapFlags { cudaD3D10MapFlagsNone = 0, cudaD3D10MapFlagsReadOnly = 1, cudaD3D10MapFlagsWriteDiscard = 2} enum cudaD3D10RegisterFlags { cudaD3D10RegisterFlagsNone = 0, cudaD3D10RegisterFlagsArray = 1}

Functions

cudaError_t cudaD3D10GetDirect3DDevice (ID3D10Device **ppD3D10Device)

Gets the Direct3D device against which the current CUDA context was created.

cudaError_t cudaD3D10MapResources (int count, ID3D10Resource **ppResources) *Maps Direct3D Resources for access by CUDA*.

cudaError_t cudaD3D10RegisterResource (ID3D10Resource *pResource, unsigned int flags) *Registers a Direct3D 10 resource for access by CUDA.*

Gets an array through which to access a subresource of a Direct3D resource which has been mapped for access by CUDA.

 $cuda Error_t \ cuda D3D10 Resource Get Mapped Pitch \ (size_t \ *pPitch, size_t \ *pPitchSlice, the property of the property$

ID3D10Resource *pResource, unsigned int subResource)

Gets the pitch of a subresource of a Direct3D resource which has been mapped for access by CUDA.

Gets a pointer through which to access a subresource of a Direct3D resource which has been mapped for access by CUDA.

Gets the size of a subresource of a Direct3D resource which has been mapped for access by CUDA

cudaError_t cudaD3D10ResourceGetSurfaceDimensions (size_t *pWidth, size_t *pHeight, size_t
*pDepth, ID3D10Resource *pResource, unsigned int subResource)

Gets the dimensions of a registered Direct3D surface.

cudaError_t cudaD3D10ResourceSetMapFlags (ID3D10Resource *pResource, unsigned int flags) Set usage flags for mapping a Direct3D resource.

cudaError_t cudaD3D10SetDirect3DDevice (ID3D10Device *pD3D10Device, int device=-1)

Sets the Direct3D 10 device to use for interoperability with a CUDA device.

cudaError_t cudaD3D10UnmapResources (int count, ID3D10Resource **ppResources)

**Unmaps Direct3D resources.

cudaError_t cudaD3D10UnregisterResource (ID3D10Resource *pResource) *Unregisters a Direct3D resource*.

Detailed Description

This section describes deprecated Direct3D 10 interoperability functions.

Enumeration Type Documentation enum cudaD3D10MapFlags

CUDA D3D10 Map Flags

Enumerator:

cudaD3D10MapFlagsNone

Default; Assume resource can be read/written

cudaD3D10MapFlagsReadOnly

CUDA kernels will not write to this resource

cudaD3D10MapFlagsWriteDiscard

CUDA kernels will only write to and will not read from this resource

Direct3D 10 Interoperability [DEPRECATED](3) Doxygen Direct3D 10 Interoperability [DEPRECATED](3)

enum cudaD3D10RegisterFlags

CUDA D3D10 Register Flags

Enumerator:

cudaD3D10RegisterFlagsNone

Default; Resource can be accessed through a void*

cudaD3D10RegisterFlagsArray

Resource can be accessed through a CUarray*

Function Documentation

cudaError_t cudaD3D10GetDirect3DDevice (ID3D10Device ** ppD3D10Device)

Deprecated

This function is deprecated as of CUDA 5.0.

This function is deprecated and should no longer be used. It is no longer necessary to associate a CUDA device with a D3D10 device in order to achieve maximum interoperability performance.

Parameters:

ppD3D10Device - Returns the Direct3D device for this thread

Returns:

cudaSuccess, cudaErrorUnknown

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also

cudaD3D10SetDirect3DDevice

cudaError_t cudaD3D10MapResources (int count, ID3D10Resource ** ppResources) Deprecated

This function is deprecated as of CUDA 3.0.

Maps the count Direct3D resources in ppResources for access by CUDA.

The resources in ppResources may be accessed in CUDA kernels until they are unmapped. Direct3D should not access any resources while they are mapped by CUDA. If an application does so, the results are undefined.

This function provides the synchronization guarantee that any Direct3D calls issued before **cudaD3D10MapResources**() will complete before any CUDA kernels issued after **cudaD3D10MapResources**() begin.

If any of ppResources have not been registered for use with CUDA or if ppResources contains any duplicate entries then **cudaErrorInvalidResourceHandle** is returned. If any of ppResources are presently mapped for access by CUDA then **cudaErrorUnknown** is returned.

Parameters:

count - Number of resources to map for CUDA *ppResources* - Resources to map for CUDA

Returns:

cuda Success, cuda Error Invalid Resource Handle, cuda Error Unknown

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cudaGraphicsMapResources

cudaError_t cudaD3D10RegisterResource (ID3D10Resource * pResource, unsigned int flags) Deprecated

This function is deprecated as of CUDA 3.0.

Registers the Direct3D resource pResource for access by CUDA.

If this call is successful, then the application will be able to map and unmap this resource until it is unregistered through **cudaD3D10UnregisterResource()**. Also on success, this call will increase the internal reference count on pResource. This reference count will be decremented when this resource

Direct3D 10 Interoperability [DEPRECATED](3)DoxygenDirect3D 10 Interoperability [DEPRECATED](3)

is unregistered through cudaD3D10UnregisterResource().

This call potentially has a high-overhead and should not be called every frame in interactive applications.

The type of pResource must be one of the following:

- ID3D10Buffer: Cannot be used with flags set to cudaD3D10RegisterFlagsArray.
- ID3D10Texture1D: No restrictions.
- ID3D10Texture2D: No restrictions.
- ID3D10Texture3D: No restrictions.

The flags argument specifies the mechanism through which CUDA will access the Direct3D resource. The following values are allowed.

- cudaD3D10RegisterFlagsNone: Specifies that CUDA will access this resource through a void*. The pointer, size, and pitch for each subresource of this resource may be queried through cudaD3D10ResourceGetMappedPointer(), cudaD3D10ResourceGetMappedSize(), and cudaD3D10ResourceGetMappedPitch() respectively. This option is valid for all resource types.
- **cudaD3D10RegisterFlagsArray**: Specifies that CUDA will access this resource through a CUarray queried on a sub-resource basis through **cudaD3D10ResourceGetMappedArray**(). This option is only valid for resources of type ID3D10Texture1D, ID3D10Texture2D, and ID3D10Texture3D.

Not all Direct3D resources of the above types may be used for interoperability with CUDA. The following are some limitations.

- The primary rendertarget may not be registered with CUDA.
- Resources allocated as shared may not be registered with CUDA.
- Textures which are not of a format which is 1, 2, or 4 channels of 8, 16, or 32-bit integer or floating-point data cannot be shared.
- Surfaces of depth or stencil formats cannot be shared.

If Direct3D interoperability is not initialized on this context then **cudaErrorInvalidDevice** is returned. If pResource is of incorrect type or is already registered then **cudaErrorInvalidResourceHandle** is returned. If pResource cannot be registered then **cudaErrorUnknown** is returned.

Parameters:

pResource - Resource to registerflags - Parameters for resource registration

Returns

 $cuda Success, \ cuda Error Invalid Device, \ cuda Error Invalid Value, \\ cuda Error Invalid Resource Handle, \ cuda Error Unknown$

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cuda Graphics D3D10 Register Resource

$cuda Error_t\ cuda D3D10 Resource Get Mapped Array\ (cuda Array\ **\ pp Array,\ ID3D10 Resource\ *\ pResource,\ unsigned\ int\ sub Resource)$

Deprecated

This function is deprecated as of CUDA 3.0.

cudaErrorUnknown is returned.

Returns in *ppArray an array through which the subresource of the mapped Direct3D resource pResource which corresponds to subResource may be accessed. The value set in ppArray may change every time that pResource is mapped.

If pResource is not registered, then **cudaErrorInvalidResourceHandle** is returned. If pResource was not registered with usage flags **cudaD3D10RegisterFlagsArray**, then **cudaErrorInvalidResourceHandle** is returned. If pResource is not mapped then

Direct3D_10_Interoperability_[DEPRECATED](3)DoxygenDirect3D_10_Interoperability_[DEPRECATED](3)

For usage requirements of the subResource parameter, see cudaD3D10ResourceGetMappedPointer().

Parameters:

ppArray - Returned array corresponding to subresourcepResource - Mapped resource to accesssubResource - Subresource of pResource to access

Returns:

 ${\bf cuda Success, cuda Error Invalid Value, cuda Error Invalid Resource Handle, cuda Error Unknown}$

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cuda Graphics Sub Resource Get Mapped Array

This function is deprecated as of CUDA 3.0.

Returns in *pPitch and *pPitchSlice the pitch and Z-slice pitch of the subresource of the mapped Direct3D resource pResource, which corresponds to subResource. The values set in pPitch and pPitchSlice may change every time that pResource is mapped.

The pitch and Z-slice pitch values may be used to compute the location of a sample on a surface as follows.

For a 2D surface, the byte offset of the sample at position x, y from the base pointer of the surface is:

```
y * pitch + (bytes per pixel) * x
```

For a 3D surface, the byte offset of the sample at position x, y, z from the base pointer of the surface is:

```
z* slicePitch + y * pitch + (bytes per pixel) * x
```

Both parameters pPitch and pPitchSlice are optional and may be set to NULL.

If pResource is not of type ID3D10Texture1D, ID3D10Texture2D, or ID3D10Texture3D, or if pResource has not been registered for use with CUDA, then **cudaErrorInvalidResourceHandle** is returned. If pResource was not registered with usage flags **cudaD3D10RegisterFlagsNone**, then **cudaErrorInvalidResourceHandle** is returned. If pResource is not mapped for access by CUDA then **cudaErrorUnknown** is returned.

For usage requirements of the subResource parameter see cudaD3D10ResourceGetMappedPointer().

Parameters:

```
    pPitch - Returned pitch of subresource
    pPitchSlice - Returned Z-slice pitch of subresource
    pResource - Mapped resource to access
    subResource - Subresource of pResource to access
```

Returns

cuda Success, cuda Error Invalid Value, cuda Error Invalid Resource Handle, cuda Error Unknown

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cudaGraphicsSubResourceGetMappedArray

$cuda Error_t\ cuda D3D10 Resource Get Mapped Pointer\ (void\ **\ pPointer\ , ID3D10 Resource\ *\ pResource\ , unsigned\ int\ sub Resource)$

Deprecated

This function is deprecated as of CUDA 3.0.

Returns in *pPointer the base pointer of the subresource of the mapped Direct3D resource

Direct3D_10_Interoperability_[DEPRECATED](3)DoxygenDirect3D_10_Interoperability_[DEPRECATED](3)

pResource which corresponds to subResource. The value set in pPointer may change every time that pResource is mapped.

If pResource is not registered, then **cudaErrorInvalidResourceHandle** is returned. If pResource was not registered with usage flags **cudaD3D9RegisterFlagsNone**, then

cudaErrorInvalidResourceHandle is returned. If pResource is not mapped then **cudaErrorUnknown** is returned.

If pResource is of type ID3D10Buffer then subResource must be 0. If pResource is of any other type, then the value of subResource must come from the subresource calculation in D3D10CalcSubResource().

Parameters:

```
pPointer - Returned pointer corresponding to subresourcepResource - Mapped resource to accesssubResource - Subresource of pResource to access
```

Returns:

 $cuda Success, \ cuda Error Invalid Value, \ cuda Error Invalid Resource Handle, \ cuda Error Unknown$

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cuda Graphics Resource Get Mapped Pointer

$cuda Error_t\ cuda D3D10 Resource Get Mapped Size\ (size_t\ *pSize\ , ID3D10 Resource\ *pResource\ , unsigned\ int\ sub Resource)$

Deprecated

This function is deprecated as of CUDA 3.0.

Returns in *pSize the size of the subresource of the mapped Direct3D resource pResource which corresponds to subResource. The value set in pSize may change every time that pResource is mapped.

If pResource has not been registered for use with CUDA then cudaErrorInvalidHandle is returned. If pResource was not registered with usage flags **cudaD3D10RegisterFlagsNone**, then **cudaErrorInvalidResourceHandle** is returned. If pResource is not mapped for access by CUDA then **cudaErrorUnknown** is returned.

For usage requirements of the subResource parameter see cudaD3D10ResourceGetMappedPointer().

Parameters:

```
pSize - Returned size of subresourcepResource - Mapped resource to accesssubResource - Subresource of pResource to access
```

Returns:

```
cuda Success, \ cuda Error Invalid Value, \ cuda Error Invalid Resource Handle, \ cuda Error Unknown
```

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cuda Graphics Resource Get Mapped Pointer

$cuda Error_t\ cuda D3D10 Resource Get Surface Dimensions\ (size_t\ *\ pWidth,\ size_t\ *\ pHeight,\ size_t\ *\ pDepth,\ ID3D10 Resource\ *\ pResource,\ unsigned\ int\ subResource)$ Deprecated

This function is deprecated as of CUDA 3.0.

Returns in *pWidth, *pHeight, and *pDepth the dimensions of the subresource of the mapped Direct3D resource pResource which corresponds to subResource.

Since anti-aliased surfaces may have multiple samples per pixel, it is possible that the dimensions of a resource will be an integer factor larger than the dimensions reported by the Direct3D runtime.

Direct3D 10 Interoperability [DEPRECATED](3) Doxygen Direct3D 10 Interoperability [DEPRECATED](3)

The parameters pWidth, pHeight, and pDepth are optional. For 2D surfaces, the value returned in *pDepth will be 0.

If pResource is not of type ID3D10Texture1D, ID3D10Texture2D, or ID3D10Texture3D, or if pResource has not been registered for use with CUDA, then cudaErrorInvalidHandle is returned.

For usage requirements of subResource parameters see cudaD3D10ResourceGetMappedPointer().

Parameters:

```
    pWidth - Returned width of surface
    pHeight - Returned height of surface
    pDepth - Returned depth of surface
    pResource - Registered resource to access
    subResource - Subresource of pResource to access
```

Returns.

cuda Success, cuda Error Invalid Value, cuda Error Invalid Resource Handle,

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cudaGraphicsSubResourceGetMappedArray

cudaError_t cudaD3D10ResourceSetMapFlags (ID3D10Resource * pResource, unsigned int flags) Deprecated

This function is deprecated as of CUDA 3.0.

Set usage flags for mapping the Direct3D resource pResource.

Changes to flags will take effect the next time pResource is mapped. The flags argument may be any of the following:

- **cudaD3D10MapFlagsNone**: Specifies no hints about how this resource will be used. It is therefore assumed that this resource will be read from and written to by CUDA kernels. This is the default value.
- cudaD3D10MapFlagsReadOnly: Specifies that CUDA kernels which access this resource will not write to this resource.
- cudaD3D10MapFlagsWriteDiscard: Specifies that CUDA kernels which access this resource will not read from this resource and will write over the entire contents of the resource, so none of the data previously stored in the resource will be preserved.

If pResource has not been registered for use with CUDA then cudaErrorInvalidHandle is returned. If pResource is presently mapped for access by CUDA then cudaErrorUnknown is returned.

Parameters:

```
pResource - Registered resource to set flags for flags - Parameters for resource mapping
```

Returns:

 $cuda Success, \ cuda Error Invalid Value, \ cuda Error Invalid Resource Handle, \ cuda Error Unknown,$

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cuda Graphics Resource Set Map Flags

$cudaError_t\ cudaD3D10SetDirect3DDevice\ (ID3D10Device\ *\ pD3D10Device,\ int\ device\ =\ -1)\\ Deprecated$

This function is deprecated as of CUDA 5.0.

This function is deprecated and should no longer be used. It is no longer necessary to associate a CUDA device with a D3D10 device in order to achieve maximum interoperability performance.

Parameters:

pD3D10Device - Direct3D device to use for interoperability

Direct3D_10_Interoperability_[DEPRECATED](3)DoxygenDirect3D_10_Interoperability_[DEPRECATED](3)

device - The CUDA device to use. This device must be among the devices returned when querying **cudaD3D10DeviceListAll** from **cudaD3D10GetDevices**, may be set to −1 to automatically select an appropriate CUDA device.

Returns:

cuda Success, cuda Error Initialization Error, cuda Error Invalid Value, cuda Error Set On Active Process

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cuda D3D10 Get Device, cuda Graphics D3D10 Register Resource, cuda Device Reset

cudaError_t cudaD3D10UnmapResources (int count, ID3D10Resource ** ppResources) Deprecated

This function is deprecated as of CUDA 3.0.

Unmaps the count Direct3D resource in ppResources.

This function provides the synchronization guarantee that any CUDA kernels issued before **cudaD3D10UnmapResources()** will complete before any Direct3D calls issued after **cudaD3D10UnmapResources()** begin.

If any of ppResources have not been registered for use with CUDA or if ppResources contains any duplicate entries, then **cudaErrorInvalidResourceHandle** is returned. If any of ppResources are not presently mapped for access by CUDA then **cudaErrorUnknown** is returned.

Parameters:

count - Number of resources to unmap for CUDA *ppResources* - Resources to unmap for CUDA

Returns.

cuda Success, cuda Error Invalid Resource Handle, cuda Error Unknown

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cuda Graphics Unmap Resources

cudaError_t cudaD3D10UnregisterResource (ID3D10Resource * pResource) Deprecated

This function is deprecated as of CUDA 3.0.

Unregisters the Direct3D resource resource so it is not accessible by CUDA unless registered again.

If pResource is not registered, then cudaErrorInvalidResourceHandle is returned.

Parameters:

pResource - Resource to unregister

Returns:

cuda Success, cuda Error Invalid Resource Handle, cuda Error Unknown

Note:

Note that this function may also return error codes from previous, asynchronous launches.

See also:

cuda Graphics Unregister Resource
