NAME

Dancer2::Logger::File – file−based logging engine for Dancer2

VERSION

version 0.160003

DESCRIPTION

This is a logging engine that allows you to save your logs to files on disk.

Logs are not automatically rotated. Use a log rotation tool like `logrotate` in `copytruncate` mode.

METHODS

log($level, `$message`**)**

Writes the log message to the file.

CONFIGURATION

The setting `logger` should be set to `File` in order to use this logging engine in a Dancer2 application.

The follow attributes are supported:

Here is an example configuration that use this logger and stores logs in */var/log/myapp*:

```
logger: "File"

engines:
  logger:
    File:
      log_dir: "/var/log/myapp"
      file_name: "myapp.log"
```
