

Module::CPANTS::Kwalitee::Files(3pm) Perl Contributed Perl Documentation Module::CPANTS::Kwalitee::Files(3pm)

NAME

Module::CPANTS::Kwalitee::Files – Check for various files

SYNOPSIS

Find various files and directories that should be part of every self-respecting distribution.

DESCRIPTION

Methods

order

Defines the order in which Kwalitee tests should be run.

Returns 15, as data generated by MCK::Files is used by all other tests.

analyse

MCK::Files uses File::Find::Object to get a list of all files and dirs in a dist. It checks if certain crucial files are there, and does some other file-specific stuff.

kwalitee_indicators

Returns the Kwalitee Indicators datastructure.
