

MojoMojo::Controller::PageAdmin(3pm) User Contributed Perl Documentation MojoMojo::Controller::PageAdmin(3pm)

NAME

MojoMojo::Controller::PageAdmin – MojoMojo Page Administration

SYNOPSIS

See MojoMojo

DESCRIPTION

Methods for updating pages: edit, rollback, permissions change, rename.

METHODS**auto**

Check that user is logged in and has rights to this page.

unauthorized

Private action to return a 403 with an explanatory template.

edit

This action will display the edit form, then save the previous revision, and create a new one based on the posted content. After saving, it will forward to the highlight action.

permissions

This action allows page permissions to be displayed and edited.

rollback

This action will revert a page to a older revision.

title (.info/title)

AJAX method for renaming a page. Creates a new PageVersion with the rename, so that the renaming itself could in the future be shown in the page history.
