

MojoMojo::Formatter::GoogleSearch(3pm) - Contributed Perl Document MojoMojo::Formatter::GoogleSearch(3pm)

NAME

MojoMojo::Formatter::GoogleSearch – Linked Google Search Engine by writing `{{google:<search kind> <keyword>}}`

DESCRIPTION

Normally, to hyperlink to a Search Engine, you'd write:

```
[google SearchWord](http://www.google.com/search?q=SearchWord)
```

This plugin lets you write just

```
{{google SearchWord}}
```

not just Search Web, you can search images and movies

```
{{google:image SearchWord}}
```

```
{{google:movie SearchWord}}
```

METHODS

format_content_order

The SearchEngine formatter has no special requirements in terms of the order it gets run in, so it has a priority of 16.

format_content

Calls the formatter. Takes a ref to the content as well as the context object.

process

Here the actual formatting is done.
