NAME

MojoMojo::Model::Search − support for searching pages

METHODS

indexer

Index the search data

searcher

Used by *search()* to do the grunt work.

prepare_search_index

Create a new search index from all pages in the database. Will do nothing if the index already exists.

index_page <page>

Create/update the search index with data from a MojoMojo page when it changes.

search

Search for a term or phrase.

delete_page <page>

Removes a page from the search index.
