

MojoMojo::Schema::Result::Photo(3pm) User Contributed Perl Documentation MojoMojo::Schema::Result::Photo(3pm)

NAME

MojoMojo::Schema::Result::Photo – store photos

METHODS

extract_exif

Extracts EXIF information from a given Attachment and populates the Photo object.

exif2datetime datetime

Creates a DateTime object from an EXIF timestamp.

prev_by_tag <tag>

Return previous image when browsing by the given tag.

next_by_tag <tag>

Return the next image when browsing by the given tag.

others_tags <user>

Tags other users have given to this photo.

user_tags <user>

Tags this user has given to this photo.

make_inline

Create a resized version of a photo suitable for inline usage.

make_thumb

Create a thumbnail version of a photo, for gallery views and linking to pages.
