

MooseX::App::Cmd::Command(3pm) User Contributed Perl Documentation MooseX::App::Cmd::Command(3pm)

NAME

MooseX::App::Cmd::Command – Base class for MooseX::Getopt based App::Cmd::Commands

VERSION

version 0.32

SYNOPSIS

```
use Moose;

extends qw(MooseX::App::Cmd::Command);

# no need to set opt_spec
# see MooseX::Getopt for documentation on how to specify options
has option_field => (
    isa => 'Str',
    is   => 'rw',
    required => 1,
);

sub execute {
    my ( $self, $opts, $args ) = @_;

    print $self->option_field; # also available in $opts->{option_field}
}
```

DESCRIPTION

This is a replacement base class for App::Cmd::Command classes that includes MooseX::Getopt and the glue to combine the two.

METHODS

_process_args

Replaces App::Cmd::Command's argument processing in favor of MooseX::Getopt based processing.

If your class does the MooseX::ConfigFromFile role (or any of its consuming roles like MooseX::SimpleConfig), this will provide an additional `--configfile` command line option for loading options from a configuration file.

SUPPORT

Bugs may be submitted through the RT bug tracker
<<https://rt.cpan.org/Public/Dist/Display.html?Name=MooseX-App-Cmd>> (or
bug-MooseX-App-Cmd AT rt DOT cpan DOT org <<mailto:bug-MooseX-App-Cmd AT rt DOT cpan DOT org>>).

There is also a mailing list available for users of this distribution, at <http://lists.perl.org/list/moose.html>.

There is also an irc channel available for users of this distribution, at <irc://irc.perl.org/#moose>.
