

MooseX::Declare::Syntax::Keyword::MethodModifier(3pm)

## NAME

MooseX::Declare::Syntax::Keyword::MethodModifier – Handle method modifier declarations

## VERSION

version 0.43

## DESCRIPTION

Allows the implementation of method modification handlers like `around` and `before`.

## ATTRIBUTES

### **modifier\_type**

A required string that is one of:

- `around`
- `after`
- `before`
- `override`
- `augment`

## METHODS

### **register\_method\_declaration**

`Object->register_method_declaration (Object $metaclass, Str $name, Object $method)`

This will add the method modifier to the `$metaclass` via `Moose::Utils add_method_modifier`, whose return value will also be returned from this method.

## CONSUMES

- `MooseX::Declare::Syntax::MethodDeclaration`

## SEE ALSO

- `MooseX::Declare`
- `MooseX::Declare::Syntax::MooseSetup`
- `MooseX::Declare::Syntax::MethodDeclaration`
- `MooseX::Method::Signatures`
