

MooseX::NonMoose::Meta::Role::Constructor(3pm) - MooseX::NonMoose::Meta::Role::Constructor(3pm)

NAME

MooseX::NonMoose::Meta::Role::Constructor – constructor method trait for MooseX::NonMoose

VERSION

version 0.26

SYNOPSIS

```
package My::Moose;
use Moose ();
use Moose::Exporter;

Moose::Exporter->setup_import_methods;
sub init_meta {
    shift;
    my %options = @_;
    Moose->init_meta(%options);
    Moose::Util::MetaRole::apply_metaclass_roles(
        for_class          => $options{for_class},
        metaclass_roles    => ['MooseX::NonMoose::Meta::Role::Class'],
        constructor_class_roles =>
            ['MooseX::NonMoose::Meta::Role::Constructor'],
    );
    return Moose::Util::find_meta($options{for_class});
}
```

DESCRIPTION

This trait implements inlining of the constructor for classes using the MooseX::NonMoose::Meta::Role::Class metaclass trait; it has no effect unless that trait is also used. See those docs and the docs for MooseX::NonMoose for more information.
