

MooseX::XSAccessor::Trait::Attribute(3pm) contributed Perl Documentation MooseX::XSAccessor::Trait::Attribute(3pm)

NAME

MooseX::XSAccessor::Trait::Attribute – get the Class::XSAccessor effect for a single attribute

SYNOPSIS

```
package MyClass;

use Moose;

has foo => (
    traits => ["MooseX::XSAccessor::Trait::Attribute"],
    ...
);

say __PACKAGE__->meta->get_attribute("foo")->accessor_is_simple;
```

DESCRIPTION

Attributes with this trait have the following additional methods, which each return booleans:

```
accessor_is_simple
reader_is_simple
writer_is_simple
predicate_is_simple
clearer_is_simple
```

What is meant by simple? Simple enough for Class::XSAccessor to take over the accessor's duties.

BUGS

Please report any bugs to <<http://rt.cpan.org/Dist/Display.html?Queue=MooseX-XSAccessor>>.
