

NAME

mplist_find_by_key – Find a property of a specific key in a property list.

SYNOPSIS

MList* mplist_find_by_key (**MList** * *plist*, **MSymbol** *key*)

DESCRIPTION

Find a property of a specific key in a property list. The **mplist_find_by_key()** function searches property list **plist** from the beginning for a property whose key is **key**. If such a property is found, a sublist of **plist** whose first element is the found one is returned. Otherwise, **NULL** is returned.

If **key** is **Mnil**, it returns a sublist of **plist** whose first element is the last one of **plist**.
