

NAME

mplist_pop – Remove a property at the beginning of a property list.

SYNOPSIS

```
void* mplist_pop (MPlist * plist)
```

DESCRIPTION

Remove a property at the beginning of a property list. The **mplist_pop()** function removes a property at the beginning of property list **plist**. As a result, the second key and value of the **plist** become the first ones.

RETURN VALUE

If the operation was successful, this function return the value of the just popped property.
Otherwise, it returns NULL.
