

**NAME**

mtext\_titlecase – Titlecase an M–text.

**SYNOPSIS**

int **mtext\_titlecase** (**MText** \* *mt*)

**DESCRIPTION**

Titlecase an M–text. The **mtext\_titlecase()** function destructively converts the first character with the cased property in M–text **mt** to titlecase and the others to lowercase. The length of **mt** may change. If the character cannot be converted to titlecase, it is left unchanged. All the text properties are inherited.

**RETURN VALUE**

This function returns the length of the updated **mt**.

**SEE ALSO**

**mtext\_lowercase()**, **mtext\_uppercase()**
