

**NAME**

libmtp -

**SYNOPSIS**

```
#include <libmtp.h>
```

**Data Fields**

```
uint32_t width  
uint32_t height  
uint32_t duration  
LIBMTP_filetype_t filetype  
uint64_t size  
char * data
```

**Detailed Description**

LIBMTP Object RepresentativeSampleData Structure

**Field Documentation****char\* LIBMTP\_filesampledata\_struct::data**

Sample data

Referenced by LIBMTP\_destroy\_filesampledata\_t().

**uint32\_t LIBMTP\_filesampledata\_struct::duration**

Duration in milliseconds if it is audio

**LIBMTP\_filetype\_t LIBMTP\_filesampledata\_struct::filetype**

Filetype used for the sample

**uint32\_t LIBMTP\_filesampledata\_struct::height**

Height of sample if it is an image

Referenced by LIBMTP\_new\_filesampledata\_t().

**uint64\_t LIBMTP\_filesampledata\_struct::size**

Size of sample data in bytes

**uint32\_t LIBMTP\_filesampledata\_struct::width**

Width of sample if it is an image

**Author**

Generated automatically by Doxygen for libmtp from the source code.
