

NAME

fetch-ebook-metadata – fetch-ebook-metadata

`fetch-ebook-metadata [options]`

Fetch book metadata from online sources. You must specify at least one of title, authors or ISBN.

Whenever you pass arguments to **fetch-ebook-metadata** that have spaces in them, enclose the arguments in quotation marks. For example: `“/some path/with spaces”`

[AUKERAK]**--allowed-plugin, -p**

Specify the name of a metadata download plugin to use. By default, all metadata plugins will be used. Can be specified multiple times for multiple plugins. All plugin names: Google, Google Images, Amazon.com, Edelweiss, Open Library, ISBNDB, Overdrive, Douban Books, OZON.ru, Big Book Search

--authors, -a

Liburuaren egilea(k)

--cover, -c

Specify a filename. The cover, if available, will be saved to it. Without this option, no cover will be downloaded.

--help, -h

Erakutsi laguntza mezu hau eta irten

--isbn, -i

Liburuaren ISBNa

--opf, -o

Output the metadata in OPF format instead of human readable text.

--timeout, -d

Timeout in seconds. Default is 30

--title, -t

Liburuaren izenburua

--verbose, -v

Print the log to the console (stderr)

--version

Erakutsi programaren bertsioa zein den eta irten
